

# 3D SWING ANALYSIS

MySwing 3D offers the most advanced lesson available in golf! 17 sensors, 9 degrees of freedom and includes full-body tilts angles, rotations, wrist angles, centre of mass, swing plane and much more.

MySwing system produces a full body 3D avatar using the lightweight sensors, showing you things that cannot be seen with cameras or by your eyes. 32 parameters can then be applied to the avatar, giving a visual representation of key elements in the golf swing. This is truly a unique and educating experience
